CHALLENGE ACCEPTED

GENUINE WINTER WHEELS AND APPROVED TIRES

RISE TO THE OCCASION

The toughest possible conditions, the highest possible standards. We see the world's most severe winter weather as a test. It's a test for our engineering, our design and, last but not least, our people. The mission is simple—to keep you in control and to keep you safe, whatever it takes. We accept the challenge.

Jaguar winter wheels are designed and rigorously tested by our specialist engineers to complement your vehicle's thrilling performance. We also work with some of the world's most respected premium tire manufacturers to offer one of the finest ranges of Genuine Winter Wheels and Approved Tires available.

Our collection of winter wheels and tires deliver the best possible handling, no matter how demanding the road ahead may be. They are built for durability as well as to provide optimum grip, traction and, of course, Jaguar levels of refinement.

WINTERPROOF

APPROVED TIRES

Jaguar winter tires deliver exciting and resilient performance. Designed to work in perfect unison with your Jaguar vehicle's wheels, they've been tested down to -30°C and driven on frozen surfaces, to ensure this performance is maintained in extreme weather.

High-speed wet-track testing ensures Jaguar winter tires maintain the strongest possible grip even in heavy rain. This is followed by stability testing to establish superior handling during dynamic manoeuvres.*

GENUINE WHEELS

Been there, done that. Jaguar wheels undergo a wide variety of rigorous tests to prepare them for extreme winter surfaces and conditions.

These tests include:

- Temperature Testing: Wheels are tested to endure a temperature range from -40°C to 80°C and in conditions of 100% relative humidity.
- Accelerated Environmental Testing: Each wheel is blasted continuously with salt, dirt and dust to simulate every possible driving condition.
- Curb Testing: To make sure our wheels are capable of withstanding accidental impacts and maintaining their structural integrity, we drive them into a 150 mm curb at 40 km/h.

*Only applies to Alpine winter tires.

FULL STOP

The ability to stop quickly and in control is even more important during unpredictable winter weather. Our Approved Winter Tires have a significantly shorter stopping distance than our summer tires in winter conditions—reducing braking distance by up to 64% when a vehicle is travelling at a speed of 60 km/h on an icy road.* So as temperatures plummet, you'll drive with confidence no matter where you go.

JAGUAR ACCESSORIES

Accessories are designed and engineered to withstand extreme conditions. They're extensively tested to ensure quality, compatibility and a strong, even performance.

Explore the full range of winter accessories at accessories.jaguar.com or contact your local Jaguar Authorized Retailer.

1. Rubber Mats

Hard-wearing Jaguar branded rubber mats provide added protection for your vehicle's carpets.

2. Front/Rear Splash Guards

Jaguar branded front and rear splash guards complement the lines of your vehicle, reduce spray and provide protection from dirt and stone chippings.

3. Luggage Compartment Rubber Mat

This premium mat is tailored specifically to protect the luggage compartment. Light and durable, it is easily removable for cleaning.

4. Ski/Snowboard Holder*

A safe and secure Jaguar branded system for transporting winter sports equipment.

5. Ski Bag

Jaguar ski bag designed to fit through the retailer fit ski hatch, or with the rear 60:40 seat(s) folded down. Manufactured from durable 600D polyester, the ski bag features padded construction to provide protection and removable shoulder straps to aid carrying.

*Requires roof cross bars J9C2658 or J9C2673. Objects placed above the roof-mounted satellite antenna may reduce the quality of the signal received by the vehicle and could have a detrimental effect on the navigation and satellite radio systems, if fitted.
